

What to expect during the Quant interview process

Thinking of applying for a quant role or internship at Wincent? Here's what our interview process looks like and what you can expect along the way.

1. Online Assessment

We start with a timed assessment focused on probability, statistics, and logical reasoning. The goal is to see how you think under pressure and how you approach uncertainty — not whether you've studied trading before.

2. Technical Rounds

If you pass the assessment, you'll be invited to two technical interviews. These go deeper into problem-solving: probability, combinatorics, statistics, and mental math. We want to see your reasoning and how you explain your thought process.

3. On-Site Interview in Bratislava

The final stage takes place in our Bratislava office. You'll participate in interactive betting games designed to simulate real decision-making. You'll also meet our team, get a feel for the culture, and experience the collaborative environment firsthand.

4. Quick Timeline

From application to final decision, the process usually takes **1–3 weeks**. Exceptional candidates sometimes complete it in as little as 10 days. We aim to give you feedback quickly at every step.

5. What We Look For

- Strong problem-solving ability
- Curiosity and willingness to learn
- Clear, structured communication
- Comfort with uncertainty and quick decisions

Final word: Our process is challenging, but it's designed to be fair and fun. Think of it as an opportunity to show how you think, not what you've memorized.

Ready to apply? Start your journey today. The next round of interns and traders begins with you.
